

Photoshop CS6 Introduction

Prerequisites: Before taking this course, students should be familiar with the basic functions of their computer's operating system, such as creating folders, launching programs, and working with windows. They should also have basic Windows application skills, such as copying and pasting objects, formatting text, saving files, etc. The students should also be familiar with the basic features/functions and terminology of image editing.

Length: One Day

Summary: You will explore the Photoshop CS6 interface and use several tools for selecting parts of images. You will learn to use layers and to apply layer effects and filters to create special effects. Additionally, you will use painting tools and blending modes to create shading effects. Finally, you will save images in print and web formats.

Course Content
