## VALUE STREAM MAPPING WORKSHOPS

### Value Stream Mapping Workshop

**Length:** One-day

**Summary:** The one-day workshop includes an hour of classroom-style lecture and an exercise, which creates a familiar VSM for a process.

The remaining part of the day is spent on creating a real current state VSM for one client process that includes identifying kaizen bursts (improvement ideas).

**Included in the Workshop:** Classroom lessons, simulation, value stream map simulation

### Value Stream Mapping Workshop

**Length:** Two-days

**Summary:** The two-day workshop includes an hour of classroom-style lecture and an exercise, which creates a familiar VSM for a process.

The remaining part of the first day is spent on creating a real current state VSM for one client process that includes identifying kaizen bursts (improvement ideas).

The second day is spent prioritizing/evaluating the kaizen bursts, and then creating a real future state VSM for that same process.

**Included in the Workshop:** Classroom lessons, simulation, value stream map simulation, and value stream map a client process
