

Microsoft Project Server 2013/2016 for Project Managers

Length: 3 Days

Prerequisites: To ensure your success in this course, you should have basic project management knowledge and skills. You should also have basic knowledge and skills for using any current Windows® operating system—preferably Windows 10. Finally, you should have competency in using other Microsoft Office applications—preferably Office 2016. You can take any of the Office 2016 course offerings to attain the requisite knowledge and skills.

Target audience: This course is designed for students with an understanding of project management concepts who are responsible for creating and maintaining project plans. Target students will be looking to acquire the advanced knowledge and skills a project manager needs to update a project plan in Project 2013/2016 during the execution, monitoring, and controlling phases of a project.

Course objectives: Upon successful completion of this course, you will be able to manage an existing Microsoft Project 2013/2016 project plan. You will: Update a project plan to reflect progress as you execute the project. Monitor project progress in the project plan. Adjust the project plan to control constraints. Create project reports to share a project's status. Customize project settings and share customizations with other projects.
